What is Palliative Care?
Finding the Right Message

Lauren Michalakes, MD, MPH
Jane Conrad, JD
Neither presenter has anything to disclose. There are no financial conflicts of interest to report.
Goals for today:

• Describe the medical provider factors that lead to lack of referral for palliative care services

• Describe the patient, family and consumer factors that lead to lack of acceptance or, or utilization of palliative care services

• Describe strategies to clarify definitions of palliative care and to describe and message these definitions, in ways that are helpful, honest and supportive of patients’ goals for care
Palliative Care is............
What is Palliative Care?

Palliative care is specialized medical care for people living with a serious illness. This type of care is focused on providing relief from the symptoms and stress of the illness. The goal is to improve quality of life for both the patient and the family.

Palliative care is provided by a specially-trained team of doctors, nurses and other specialists who work together with a patient’s other doctors to provide an extra layer of support. Palliative care is based on the needs of the patient, not on the patient’s prognosis. It is appropriate at any age and at any stage in a serious illness, and it can be provided along with curative treatment.
Words Matter....

• Medical sub-specialty: Hospice and Palliative Medicine
  • Subspecialist and generalist skill sets

• Hospice

• Palliative Care

• Advance Directives, Living Wills, Power of Attorney for Health Care, POLST Forms

• Terminal, Advanced, Serious, and Chronic Illness
  • What’s the difference?
What is quality of life... in the face of a serious illness?
“You’ve got six months, but with aggressive treatment we can help make that seem much longer.”
Conceptual Shift for Palliative Care

Death
Public Perceptions....

- 80%-90% report awareness, importance of advance care planning
  - 10-41% report completing

- 66%-71% report no awareness of palliative care
  - Of those who do, most conflate with end-of-life
  - Once shown a “definition” 95% respond favorably

- 86% aware of hospice
  - 70-91% rated favorably
  - 37% significant misconceptions
    - “giving up,” overmedicating
“He’s our new Palliative Specialist!”
Medical Provider Perceptions.....

• Not trained to give up; “My job is to cure”

• Hesitancy, fearful of prognosticating
  • Afraid to be right, afraid to be wrong

• Not comfortable with skill set

• Confusion over who is appropriate?
  • Physician selected eligibility based on perceived need
    • Requires clarity, education, support
  • Identification based on algorithms, health care utilization
    • Drives eligibility back to end-of-life
Who is appropriate for palliative care?
“You have a serious illness of an undisclosed nature.”
Is this what consumers and providers want to see when talking about palliative care?
